

# Encompass Recertification Program *for* *Dedicated Man Rider® Winches*

**Comprehensive authorized services to keep your  
equipment operating safely and at peak performance.**

# Put More Life In Your Lifecycle

A Dedicated Man Rider® winch is a critical investment in safety for your personnel and operation. An Encompass Recertification is a complete overhaul service performed by an Ingersoll Rand® Authorized Service Distributor. This service provides assurance that the unit was serviced according to Ingersoll Rand specifications and will be returned in optimal operating condition.

## How Does Encompass Work?

The Encompass Recertification consists of an inspection of internal and external parts, complete unit disassembly, a non-destructive test (as required), repainting the unit, replacing worn or damaged parts, reassembly, and performing function and load testing per Ingersoll Rand specifications.

Ingersoll Rand recommends an Encompass Certification be performed every 3 years of operation for all man rider winches due to the critical nature of the product. The Encompass Rectification program is available for the LS2150, FA150 and MR150 winch models.

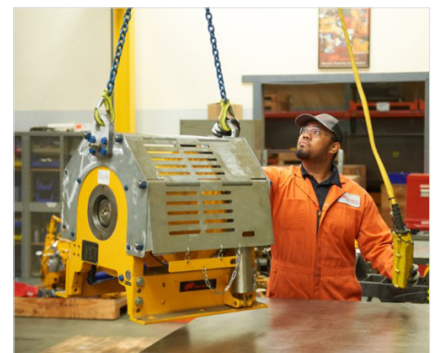

MR150 Man Rider® Winch

## What Are The Benefits Of The Encompass Recertification Program?

- 1-year Ingersoll Rand warranty supported by our global Authorized Service Network
- Equipment receives a certificate of conformance and Ingersoll Rand certified documentation to ensure your equipment was serviced according to Ingersoll Rand procedures and specifications
- Increased safety means minimized liability exposure
- Improved product performance leads to prolonged equipment life

Ingersoll Rand has an extensive global service network, which consists of Ingersoll Rand Regional Service Centers and Authorized Service Distributors, strategically located around the world. Whether it's start-up, troubleshooting or maintenance request, simply reach out and let us be the first line of defense in keeping your equipment up and running.
